

## Introducing streamSAVE's Dialogue Groups

**streamSAVE** is a 36-month Horizon 2020 project aiming to streamline energy savings calculations under Articles 3 and 7 of the Energy Efficiency Directive (EED). For more details, see: [www.streamsave.eu](http://www.streamsave.eu)

### What are Priority Actions?

The project is working on calculation methods for a selection of Priority Actions. These are **technical energy saving solutions** with high energy savings potential and selected according to stakeholder needs. streamSAVE will target a total of **10 Priority Actions over two cycles** of experience sharing and capacity building.

### What is a Dialogue Group?

A Dialogue Group gathers **experts and policy officers from various EU Member States** to **share experience and discuss** technical and economical issues related to the savings calculations for a given Priority Action. The streamSAVE team facilitates the exchanges by organising web-meetings, providing an online forum and summarizing the main lessons learnt from the discussions.

### What do I get from taking part in a group?

- Better knowledge about technical and economical issues related to savings calculations, and about practices in other countries
- Peers' and experts' support to answer my questions
- Opportunity to give my views on the methods developed by the streamSAVE project

### What involvement is expected from me?

- Taking part in 3 online web-meetings (1 per semester) and 1 workshop
- Using the online forum to ask questions or share information with my peers
- Making a presentation to share your experience (on a voluntary basis)
